

The gable goes straight
out from
the top one's crotch and his partner
is serious about
slapping paint on its
underside:

drops
of white spot
his
cheeks and nose, a bit
more of this
his face will be white as a
clown's.

"If the average market-ready duck weighs 1436 grams,
and if the average rate of weight gain is 91 grams per
week, how many days would it take to have a 500 gram
goose fat enough to market?"

one four three six,
take away five zero zero --
six and off zero is six,
three and off zero is three,
fourteen and off five is nine
(oh heart of mine) and we now have
nine-hundred and thirty-six.

Ninety per week --
seven into ninety,
seven into nine is one
and two down there --
carry zero makes twenty.
No, no (I know) ninety-one per per week --
seven into ninety-one
seven into nine is one
and two down there --
carry one makes twenty-one,
seven into twenty-one is three
even (Stephen) -- a thirteen
gram per day
weight-gain.

Thirteen into nine three six --
thirteen into ninety-three is seven
and two down there --

carry six is twenty-six,
thirteen into twenty-six is two
even (unto you, my true and blue)
and so it would take seventy-two
days exactly to market
the goose.

Ah, nein, mein Herr, while we have here
precision, we have not here accuracy --
ein duck cannot become ein goose! To
goose or to duck, now that is the
question!

In Canada at
Crystal Beach
rundown rides
and a wild laugh
in the dark which
features every day
all day at nite
in colored lites
all the time one
large fat lady
outside laughing:

Hahahahahaha
Hahahahahaha
Hahahahahaha

Three kids broke
into this ride one
day -- derailed a car
and beat the living
shit out of some poor
guy and his girl

outside large fat lady
laughing

Hahahahahaha
Hahahahahaha
Hahahahahaha
